

Gourd Birdhouses

Proceeds benefit the Deer Hollow Farm Educational Program

Large Gourds \$30

Medium Gourds \$25

Small Gourds \$20

Friends of Deer Hollow Farm is offering hand-painted gourd birdhouses like those featured here. Each house is individually painted. They are perfect for local birds such as the Western Bluebird, Chickadee, Titmouse, Bewick's Wren, Swallow and Downey Woodpecker.

Birds seem to prefer natural gourd bird houses over manufactured housing. When given a choice, and all other things are equal such as cavity size, hole size, color, and placement, they will frequently choose natural gourd birdhouses to raise their family.

Birds like an entrance hole that allows them to get inside, but keeps bigger birds and predators out. There are no perches on these birdhouses, since they encourage predators.

Each gourd bird house has two coats of Polyurethane to protect it from the elements. Hang your birdhouse outdoors. Attach it to a post or tree with plenty of space between houses.

To order: info@fodhf.org or (650) 965-FARM.
